

Mya Dhaliwal

Aspiring AI & Software Engineer

Email: myakdhaliwal@yahoo.com | **LinkedIn:** <https://www.linkedin.com/in/mya-dhaliwal-2679b7312/> | **GitHub:** <https://github.com/MyaCodes1>

SKILLS

Python • Go (Developing) • JavaScript • SQL • React • Tailwind CSS • HTML • CSS • Fast API • PyTorch • Git • GitHub • REST APIs • AI/LLM Tools (Claude, ChatGPT, Gemini) • PostgreSQL • SQLite • Matplotlib • Seaborn • PyTorch • Figma • CISCO Packet Tracer • Google Colab • Problem-solving • Collaboration • Adaptability • Communication • Ability to learn

PERSONAL SUMMARY

Final-year Computer Science student at Manchester Metropolitan University and one of five students nationally awarded the Amazon Future Engineer Scholarship. I build full-stack and AI-powered applications using Python and React and actively use LLMs as engineering tools to build, debug and learn. My background spans web development, machine learning and API integration across multiple self-driven projects. Eager to apply my skills and grow as an engineer. Graduating July 2026.

EDUCATION AND ACHIEVEMENTS

Manchester Metropolitan University - BSc in Computer Science (Sep 2023- Jul 2026)

- Achieved first-class results across key modules including Artificial Intelligence, Web Development, Databases, Networks, Software Development, Mathematics for Computing and more
- Final-year AI module project achieved a first-class mark (Pneumonia Detection AI model)

AWARDS & AFFILIATIONS

Amazon Future Engineer Scholar

- Awarded by the Royal Academy of Engineering to five students for academic excellence, engineering potential and commitment to improving representation for women in technology

Member, Rewriting the Code Society

- Career development and networking community for women in tech.

PROJECTS

Pneumonia Detection AI model (ML project, 2026)

Python • pandas • NumPy • scikit-learn • PyTorch • Matplotlib • Seaborn • Google Colab

- Built and evaluated supervised machine learning models for medical image classification
- Prototyped a convolutional neural network (CNN) for image-based pneumonia diagnosis from chest X-ray datasets
- Visualised model performance and data distributions to evaluate diagnostic accuracy and identify areas for improvement

Speech Therapy Mobile App (2026)

React • FastAPI (Python) • SQLite • SQLAlchemy • Whisper

- Building a full-stack application with a React frontend and Python/FastAPI backend, focused on accessible UX for children with speech disorders
- Implemented a progress-tracking dashboard with a data-driven UI, prioritising clean, maintainable code
- Integrated OpenAI's Whisper model via API, demonstrating experience connecting AI services into production-ready applications

Programming Languages & Paradigms (2025)

Python • Go • Scala

- Develop a maze game across three languages applying different paradigms, gaining foundational knowledge of Go's imperative approach and Python's procedural approach

Bookshop Web Application (2023)

HTML • CSS • JavaScript

- Designed and developed a responsive e-commerce website with interactive UI elements and JavaScript form validation
- Simulated RESTful workflow with structured relational data handling for products and user interactions

WORK EXPERIENCE

Sales Assistant | Urban Outfitters (Mar 2024 – Jul 2024)

- Developed strong communication, teamwork and time management skills in a fast-paced environment

Homework Club Volunteer | Moss Side Powerhouse Library (Jan 2024 – Mar 2024)

- Provided one to one support breaking down complex problems, reflecting the analytical and mentoring skills valued in research environments

Volunteer Youth Worker | SEND Youth Clubs (Jul 2018 – Mar 2022)

- Led sessions for young people with SEND, developing adaptability, creativity and an understanding of accessible, inclusive practice
